Implementation of protected designations (PDO, PGI and TSG) for agricultural products and foodstuffs in Bulgaria

Snezhana Blagoeva
EU High-Level Adviser in the field of Rural Development and Agriculture
Ministry of Agriculture, Regional Development and Environment
EU quality policy:

- highlights the qualities and tradition of EU products
- assures consumers that these are the genuine, with good name and reputation of the original
- helps producers market their products better, while providing them legal protection from misuse or falsification of a product name

EU product quality schemes relate to:

- agricultural products and foodstuffs
- wines, spirits and aromatised wines
Protected designations for agricultural products and foodstuffs

- originating in a specific place, region
- whose quality or characteristics are essentially or exclusively due to a particular geographical environment
- all production steps take place in the region

- originating in a specific place, region or country
- whose quality, reputation or other characteristic is essentially attributable to its geographical origin
- at least one of the production steps take place in the region

- products of a traditional character, either in the composition or means of production, without a specific link to a particular geographical area
There are more than 1414 protected designations in the EU:

✓ Type: About 56 TSG and 1358 PDO&PGI
✓ Countries: Italy, France, Spain, Portugal
✓ Products: fruit&vegetables, cereal products, cheese, meat, oils
EU Legislation:

- Commission Implementing Regulation (EU) No 668/2014

BG Legislation:

- Law on Implementing of Common Organization of Markets in Agricultural Products of the EU
- MAFF Ordinance 16/14.09.2007 on applications to the EC for agricultural products and foodstuffs with PGO, PGI and TSG, control on compliance with the product specification and maintenance of data bases of producers and control bodies;
- MAFF Ordinance 6/5.05.2011 on the specific requirements for implementation of official control on the use of PGO, PGI and TSG
Registration:

National Procedure

Procedure on EU level

Inclusion in the EU register for PDO, PGI and TSG
National procedure

• Who?
Group of producers: elaborates the specification; perform internal control; economy of scale

• Where?
Ministry of Agriculture, Food and Forestry, Agrofood Chain Policy Directorate

• How?
Product specification, Single document, proofs, other relevant documents
National procedure (2)

- Decision for sending the application to the EC is taken by the Minister of agriculture, food and forestry
- Supported by intergovernmental Standing Committee, which includes representatives from Ministry of agriculture, food and forestry, Ministry of economy, Ministry of Health and Patent Office
- MAFF maintains databases of producers of agricultural products and foodstuffs with PDO, PGI and TSG and the control bodies;
EU level procedure

- Review of the application by the European Commission (within 6 months);
- If all the requirements are met, publication in Official Journal for objections by MS or Third countries within 3 months period;
- Implementing Regulation by the EC for entering the name in the register, also published in Official Journal.
Controls on compliance with product specification

- by private control bodies accredited under standard EN ISO/IEC 17065:2012 by the Bulgarian Accreditation Service
- based on a contract between the producer and the control body
- control bodies have to be recognized by MAFF on the basis of application, accompanied by:
  - accreditation certificate issued by the Bulgarian Accreditation Service
  - contract with an accredited laboratory
  - control procedures
  - proofs for technical equipment, number of staff with proper qualification and experience
- MAFF supervise the activity of the control bodies
Control bodies shall perform:

- Full initial control on production facilities, capacity, traceability procedures for raw materials, capacity for implementation of the production specification, quantity produced, lab tests results
- Annual planned checks and additional checks (if needed) on compliance with the production specification, traceability of raw materials, the processed products and the final products
Control bodies are obliged to:

- comply with EU Regulations and national legislation;
- comply with the prescriptions of the supervisory authority;
- provide the information requested by MAFF and give access to their offices and other premises for inspection purposes;
- present to MAFF annual report by 31 January each year;
- to inform the ministry of the execution, amendments and termination of each contract for inspection and certification;
- not to disclose information they obtain during their inspection activity;

In case of serious non-compliance identified, the Ministry shall inform the Bulgarian Food Safety Agency for further measures to be undertaken.
Official controls over products with PDO, PGI and TSG

- performed by the Bulgarian Food Safety Agency (BFSA)
- on production, labelling, placing on the market of the products

- annually by 31 March the BFSA shall present to MAFF a detailed report about:
  - conducted audits
  - observed infringements
  - imposed penalties
  - ex-post controls
  - list controlled producers
Self-control by producers

All producers shall implement self-control procedures and support of documentation for all processes - from the raw materials until placing on the market of the final product: raw materials entry records, production records, lab probes and results, checks of the final products, records of sales.

The checks by the group of producers registered the protected designation are of high importance as well.
PGIs from Bulgaria

Горнооряховски суджук
(Gornooryahovski sudzhuk)

Българско розово масло
(Bulgarian Rose Oil)
TSGs from Bulgaria

Кайсерован врат Тракия

Филе Елена (File Elena)

Роле Трапезица (Role Trapezitsa)

Луканка Панагюрска (Lukanka Panagyurska)

Пастирма говежда (Pastarma govezhda)
Thank you!
